

Med

Changing medicine.
Together.

Med is Cell Press's flagship medical journal sitting alongside trusted and authoritative science journals including *Cell*, *Chem*, and *Joule*. *Med* publishes rigorously vetted clinical and pre-clinical translational research in all areas of contemporary medicine, as well as state-of-the-art review and perspective articles. *Med*'s mission is to accelerate translation of bench research to the clinic by providing a communication forum for the exchange of knowledge, fresh ideas, and thought leadership among researchers, clinicians, biotech/pharma scientists, and health policy experts. Our goal is to sustainably and ethically improve global health.

Topics we cover include but are not limited to:

- + Aging and health-span interventions
- + Biomedical engineering
- + Cancer / oncology
- + Cardiovascular and metabolic diseases
- + Genetics and cell-based therapies
- + Health economics and public policy
- + Human microbiome
- + Immunology
- + Infectious diseases
- + Neurology

Med's clinical and translational (CAT) scale provides an at-a-glance graphical representation of where the research lies on the bench-to-bedside continuum.

Foundational research

Technological advances and resources of broad utility for translational and clinical research.

Pre-clinical research

Pre-clinical research on disease models with the potential to be translated to human medicine.

Translation to humans

Observational studies and phase I clinical trials that apply pre-clinical discoveries and provide clinical insights.

Translation to patients

Phase II, III and IV trials, case reports.

Translation to population health

Outcome research, community-based participatory research, and population-level health assessments.

We publish research from top medical institutions including:

Institution

Harvard Medical School

Karolinska Institute

University College London

Massachusetts Institute of Technology

University of Melbourne

McGill University

The University of Tokyo

University of Amsterdam

Technical University of Munich

Shanghai Jiao Tong University
